-

100% Uptime Support

IES designs, builds and maintains communications systems for Fortune 500 companies, independent businesses and private homes. With licenses all across America, an exemplary safety record and a scalable workforce, IES can serve your needs locally, regionally and nationally. Our customized project management process ensures consistent quality and performance, along with detailed information on every project.

IES offers expert management of every aspect of Data Center infrastructure design, installation and service. We are structured cabling turnkey installation specialists with extensive experience in wireless systems. Our wide breadth of services, national workforce and service record means you only have to make one call to handle all your Data and Life Systems Security and Surveillance needs.

Traded on the NASDAQ, IES is financially secure with surety and bonding agreements nearly unmatched in the industry. One call to IES gives you consistent, cost-effective and top-quality service for all of your communications and security needs.
